The Mission of Harborside Foundation
Our primary goal is to provide scholarships for post-secondary education to the Academy’s graduates to help further their learning and life goals. Our secondary functions include breast cancer awareness – making a pre-determined monetary contribution annually to support research. We are also working to further grow a general building fund that someday will provide us to create a state of the art campus that will enhance the Expeditionary Learning Model used at Harborside Academy. Our development goal is motivated by the need for more modern facilities in which today’s students can learn and excel at their pursuits in an environmentally sound, clean and modern classroom environment.
